

SAP Business One® Fashion One

A Complete Solution Designed for Companies in the Apparel Manufacturing, Distribution or Import Business

If you run an emerging to mid-sized business that operates in the apparel, footwear or sewn products markets, the Softengine Fashion One Suite is your complete solution. Fashion One augments the core functionality of SAP Business One to provide all the tools you'll need to successfully manage the processes unique to the apparel industry, including finished and raw material sourcing and inventory, cut tickets, allocations, open-to-sell visibility, accounts payables and receivables, financials, UPC codes, EDI, E-commerce and so much more.

We believe that no two businesses are alike, which is why we are committed to developing solutions that are fully configurable. All Softengine SAP Business One suites are designed to grow with your business for the long haul.

Fashion One helps companies gain efficiencies across operational and supply chain processes through optimization of the following:

- Order Entry, incorporating a matrix of Style, Color and Size
- Inventory Control
- Seasonality Management
- Automated SKU Generation
- Warehouse Management System (WMS) and Barcode Scanning
- E-commerce Integration
- Landed Costs – Cost Control
- Sales Analysis and Reporting
- Tradeshow Capabilities
- Customer Relationship Management (CRM)
- Consigned Inventory
- Fulfillment Center Integration
- EDI

“Now that we have everything integrated into one centralized database, we can take advantage of complete tracking of every stage of production from beginning to end. Plus, with most of our processes automated, everything is more efficient, there’s no duplication of effort and we have a global view of where we are with all of our customers.”

- Warehouse Management System (WMS) with Barcode Scanning
- Remote Sales Order Entry – Mobile
- EDI
- Embedded Customer Relationship Management (CRM)
- Order Distribution Wizard
- Multi-language Capabilities
- Shipping Integration
- Built-in Factoring Functionality

Softengine Fashion One Advantages

Order Matrix Greatly Reduces Order Entry Time

The Order Matrix enables users to enter sales orders in a matrix form, instead of a by-line form. Users choose the Season and Style, and then simply navigate between the Size and Color attributes before entering quantities for each combination. The matrix supports multiple pricing structures and hierarchies and dramatically cuts down on order entry time and effort.

Order Distribution Wizard

The Order Distribution Wizard enables users to enter a Blanket Sales Order, and based upon predefined business rules, break down bulk quantities into multiple sales orders with different Ship-To addresses. The solution supports EDI- and API-based orders, so that user involvement in the process is minimal and potential user errors are reduced.

Pre-Allocation of Stock Supported Prior to Delivery

This tool enables companies to pre-allocate stock that is “on the water” or recently ordered from manufacturers, mills or vendors, to sales orders. That way, when a container arrives with the delivery, the quantities are already “sold” and tagged to specific orders and customers.

SAP CUSTOMERS PRODUCE MORE THAN

63% *of the world's brand-name jeans*

86% *of the world's athletic footwear*

Remote Access Works Wonders at Trade Shows

The ability to access the SAP Business One Fashion One system from any location is advantageous to your sales reps at trade shows. Using mobile devices such as a tablet or a smart phone, sales reps can instantly provide quotes, take orders and view available inventory right on the trade show floor.

Complete E-commerce Integration – B2C and B2B

Softengine's Fashion One Suite integrates with e-commerce platforms such as Magento and Shopify to deliver a tightly integrated platform for managing all your online product information and corresponding images. The product information is synced up between the different systems, meaning that changes made in Fashion One instantly update what is displayed on the website.

Advanced Shipping and Warehouse Management Capabilities

Fashion One offers barcode automation to facilitate faster picking and packing. Warehouse Zones, Aisles and Bins streamline warehouse organization and integration to UPS and FedEx provide automated logistics tracking and e-mail notification of shipments.

Fashion One Offers the Apparel Industry Reports You Want

Fashion One offers a wide variety of apparel industry reports that augment the core reports contained within SAP Business One. The reports are contained in the four Fashion One modules – Sales, Purchasing, Inventory and Production. A few examples include: Open RMAs Report, Customer Monthly Open Sales Order Report by Rep, Estimated PO Receive Item Detail Report, Inventory Stock Availability Report (4 Periods) and Production Summary (Cut Tickets), just to name a few.

SAP Quick Facts

- SAP touches \$16 trillion of consumer purchases around the world
- More than 70,000 users in 50 countries currently run SAP's solutions for small- to mid-sized businesses

Fashion One Sales Order with Matrix

“Our new system has enabled us to grow by 20% without having to add any staff. The level of automation we now have is awesome! We can effectively track every part of our operations in real time and effectively manage each facet of our omnichannel strategy. Visibility into our inventory at every location is crystal clear and we have instant access to all of our sales, customer and production data. As a result, we can make better decisions and better manage our growth process.”

Nora Orozco, President, BED|STÜ
